**SafeTextingCampaign.com**  
*Don't Text & Drive!*

**We must set the standard  
for positive behavior.**

- A texting driver is 20 times more likely than an attentive driver to make a critical driving error.
- 21% of injury related crashes involved distracted drivers.
- 16% of crash related fatalities were from crashes involving driver distraction.

Recognizing the tragic results of texting while driving is truly a critical issue, NerdWorld LLC has launched the Safe Texting Campaign and released the Safe Texting application for smart phones.

The SafeTexting smart phone apps use technology to reduce texting and driving. The sale of our app pays for printing educational material & fees for participation in Distracted Driving and Safety Events.
